

BEE FORAGE COVER CROP FIELD DAY

MARCH 7TH, 9TH & 15TH

9:00 -11:00 AM

Come join us to learn about the benefits cover crops can provide for your orchard!

This collaborative field day hosted by Project Apis m. and Kamprath Seeds will demonstrate how cover crops can improve soil health while improving the health and vitality of bees. Expert speakers from the grower and beekeeping community will be presenting information on:

- Seeds for Bees free seed program
- Frost and organic matter management during harvest
- Concerns about cover crops competing with almond bloom
